TIRED OF CONTINUOUS SNEEZING?
THE MEDICATIONS ARE NOT WORKING OR TIRED OF USING THE MEDICATIONS ALL THE TIME?
THERE IS A BETTER SOLUTION AVAILABLE!

> Recurrent or continuous sneezing, watering of eyes and redness of eyes are symptoms of a disease called as Allergic Rhinitis.
> Allergic Rhinitis is a genetic disease which is characterized by excessive or more than usual response to certain allergens. Whenever these allergens enter the nose, the body tries to reject them out, resulting in continuous or recurrent sneezing, watering of eyes and nose and redness of eyes.
> Treatment is usually started with tablets and nasal spray but these do not prevent the disease but rather controls the symptoms. So, as soon as the effect of the medication and spray is over, the symptoms recur.
> However, there is a better solution available, in form of an advanced endoscopic surgery.
> This surgery is performed through an endoscope, so no scars are seen on the face, and the result is apparent soon after the surgery.
